China VoIP & Digital Telecom Inc. Subsidiary Signs Strategic Agreement With Global Data Solutions Ltd.

Beijing PowerUnique Technology Co., Ltd. (BPUT), the wholly owned subsidiary of China VoIP & Digital Telecom Inc. (CVDT.OB) has signed a strategic cooperation agreement (the Agreement) with Global Data Solutions Ltd. (GDS) on March 25, 2009. GDS is the leader in business continuity and disaster recovery services in China.

According to the Agreement, BPUT and GDS will incorporate the virtualization technologies and applications into GDS' future data and disaster recovery centers as well as its IT outsourcing (ITO) service. Using BPUT's virtualization solutions, GDS will be able to not only reduce expenses on data center and disaster recovery systems but also offer technical services with higher capability and security. Also in the Agreement, GDS will allow BPUT to directly market the virtualization solutions to its existing customers.

“We feel privileged to work with such a prominent company like GDS to jointly develop China's virtualization market,” said Mr. Li Kunwu, CEO of CVDT. He added, “We believe BPUT's virtualization technology will help GDS significantly enhance its server efficiency and reduce its operating and maintenance costs. In addition, the Agreement with GDS will provide us an additional marketing channel to promote virtualization technology and applications to a wide range of GDS customers. We believe this should increase the awareness of the technology and accelerate the adoption of virtualization applications in China.”

Turn-Key Solution of BPUT on Virtualization Projects

China VoIP & Digital Telecom Subsidiary Successfully Implements the Virtualization Project in the Education Industry

Beijing PowerUnique Technology Co., Ltd. (BPUT) has successfully completed a virtualization project for the Education Commission of Chaoyang District in Beijing (Commission) in the first quarter of 2009.

During the virtualization solution implementation process, BPUT worked with Beijing Zhengqun Xinshi Information Technology Co., Ltd. (Zhengqun) by providing Zhengqun comprehensive technical support service including pre-sale training, test evaluation, solution design, and software delivery, as well as implementation and on-site training. Zhengqun applied BPUT's turn-key solution to the Commission's virtualization project, which is aimed at improving the IT management efficiency by reducing the number of servers being used and expanding the server capacity to meet high browsing demand from its website, which is used by its internal staff as well as teachers and students in the Chaoyang district in Beijing.

CVDT's Subsidiary Wins Virtualization Project Bid of National Taxation Bureau of Jinan

Jinan Yinquan Technology Co., Ltd. (Yinquan), the wholly owned subsidiary of China VoIP & Digital Telecom Inc. has successfully won the bid for the virtualization project of National Taxation Bureau of Jinan (the Bureau) in April. The Bureau, a government administrative department, is responsible for all tax revenues of Jinan city.

The Bureau selected Yinquan for the virtualization project over two other solution providers. The government official who oversaw the bidding process stated that, “Yinquan's superior technology, large implementation capacity, high-quality service and excellent performance-to-price ratio are the main reasons for us to choose its solution.” The Bureau will be a showcase by which Yinquan demonstrates its virtualization solutions for other government agencies and large-scale enterprises.

Upcoming Events

China VoIP & Digital Telecom Inc. will report its first quarter 2009 financial results before May 15.
