### China VoIP & Digital Telecom Celebrates the Grand Opening of Shandong's First Cloud Computing Laboratory

The lab was co-founded with Shandong University of Finance

The grand opening of the Cloud Computing & Virtualization Technology Laboratory was held in Shandong University of Finance ("University") on December 25, 2009. The laboratory, co-founded by Jinan Yinquan Technology ("Yinquan") and the University, is the first cloud computing and virtualization research center in Shandong province.

Cloud computing is focusing on providing various IT resources to its users through Internet. It is considered as the most outstanding development trend in the information technology industry. As previously announced, Yinquan was designated as the "Shandong Virtualization Technology Promotion and Application Center" by the Information Industry Department of Shandong

Province. Currently, the company focuses on the marketing and development of virtualization technology and cloud computing.

### Subsidiary of China VoIP & Digital Telecom Won Award for Its Contribution to the 11<sup>th</sup> National Games from the Government

Jinan Yinquan Technology ("Yinquan"), the wholly owned subsidiary of China VoIP & Digital Telecom, has won the award from the Shandong Economic and Information Commission for its great contribution to the 11<sup>th</sup> National Games of China held in October 2009. Three staffs from Yinquan have also won the individual awards.

Yinquan was one of the sponsors for China's 11<sup>th</sup> National Games. The company implemented its data center virtualization and IBCC (International Business Communication Center) platform services for the National Games. These services enhanced the information technology development of the event. The awards recognized Yinquan's efforts in accelerating the development of information technology in Shandong province.
