## VoIP Services Blocked by Government

Jinan Yinquan Technology, the wholly-owned subsidiary of China VoIP & Digital Telecom Inc. (CVDT.OB), today announced that as a result of the political riot on July 5 in Urumqi, the capital of Xinjiang Uygur Autonomous region, the country issued an order to block the VoIP services temporarily. Thus, CVDT's VoIP services are impacted.

Mr. Li Kunwu, CEO of the company said: "The block of VoIP services is a political need at this time. It only affects customers in Shandong Province. Our large enterprise clients outside of Shandong area can continue to use the services without interruption. We are doing everything we can to keep our customers informed. Currently, VoIP services have been resumed in certain regions."

Furthermore, Mr. Li added, "The block happened this time is a special issue. It doesn't mean that the country denies VoIP services completely. Since we have shifted our business focus to virtualization technology, it is unlikely this government action will result in large losses to the company."

### About China VoIP & Digital Telecom Inc.

China VoIP & Digital Telecom Inc. offers Voice Over the Internet Protocol (VOIP) telecommunications services together with the virtualization technology application in the People's Republic of China through its wholly owned subsidiary Jinan Yinquan Technology Co., Ltd.
